Nobel Biocare™

GUIDED SMILES: PREDICTABLE IMPLANT PLACEMENT THROUGH DIGITAL PLANNING

Faculty: Dr. Panchal & Bob Posey

Description:

This comprehensive one-day program is designed to help clinicians confidently integrate guided implant surgery into daily practice. Participants will gain a practical understanding of digital treatment planning, guided workflows, and execution strategies that enhance accuracy, efficiency, and patient outcomes. Emphasis will be placed on clinical decision-making, case selection, and translating digital plans into predictable surgical results.

Ideal For: Clinicians seeking to improve precision, efficiency, and consistency with guided implant workflows.
